GREAT IMPROVEMENT IN DENTI-The attention of the public is called to a great liscovery in Dentistry.

liscovery in Dentistry.

THE GREATEST ADVANCE STEP EVER
MADE IN THE ART.

The main difficulty in wearing artificial teeth is, bey do not hold in their place firmity enough, and add to this the annoyance of food getting to der the plate while eating. I have discovered a method of so constructing the plate on which the teeth are set that they will not start or drop while eating or speaking, neither will may particles of food get under the plate, no autter what the condition of the mouth is, sinch is not true of any method hithertoused.

Thave secured Letters Patent for the United states, England and France.

The improvement is not in material, but in he construction, whichs course the atmospheric ressure on the entire plate.
